

Course Name	Installing Windows 10
Course Duration	1 Day
Course Structure	Instructor-Led
Course Overview	<p>In this course, students will learn how to support the installation tasks associated with Windows 10. Students will develop skills that include learning how to install and customize Windows 10 operating systems. Students will also learn about the new Windows servicing model and methods for keeping Windows up to date. The course will conclude with common post-installation tasks.</p> <p>Audience profile Candidates for this exam are IT professionals who perform installation, configuration, general local management and maintenance of Windows 10 core services. Candidates may also be familiar with enterprise scenarios and cloud-integrated services.</p>
Course Outcome	<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none">• Prepare to install Windows 10• Install Windows 10• Configure Updates for Windows• Perform post-installation configuration tasks
Course Details	<p>Topic 1: Installing Windows</p> <p>Topic 2: Updating Windows</p> <p>Topic 3: Post-installation Configuration and Personalization</p> <p>Topic 4: Course Conclusion</p>

Course Name	Configuring Windows 10
Course Duration	2 Days
Course Structure	Instructor-Led
Course Overview	<p>In this course, students will learn how to support the configuration tasks associated with Windows 10. Students will develop skills that include managing storage, files, drivers, and printers as well as how to configure network connectivity for Windows 10. This course will also cover managing and deploying applications.</p> <p>Audience profile Candidates for this exam are IT professionals who perform installation, configuration, general local management and maintenance of Windows 10 core services. Candidates may also be familiar with enterprise scenarios and cloud-integrated services.</p>
Course Outcome	<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none">• Configure devices and drivers for Windows• Configure storage for Windows• Configure network settings in Windows• Configure remote management of Windows• Configure and manage applications in Windows• Configure Internet Explorer
Course Details	<p>Topic 1: Configuring Peripherals and Drivers</p> <p>Topic 2: Configuring Networking</p> <p>Topic 3: Configuring Storage</p> <p>Topic 4: Managing Apps in Windows 10</p> <p>Topic 5: Course Conclusion</p>

Course Name	Protecting Windows 10
Course Duration	1 Day
Course Structure	Instructor-Led
Course Overview	<p>In this course, students will learn how to secure the Windows 10 OS and protect the data on the device. Students will be introduced to common methods used for authentication and access control. This course will teach how to configure file and folder permissions and creating security policies. Students will also be introduced to the different types of external threats and how to leverage features like encryption and firewalls, as well as tools like Windows Defender.</p> <p>Audience profile Candidates for this exam are IT professionals who perform installation, configuration, general local management and maintenance of Windows 10 core services. Candidates may also be familiar with enterprise scenarios and cloud-integrated services.</p>
Course Outcome	<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none"> • Describe the methods for securing Windows 10 • Configure account access and authentication • Configure file and folder permissions • Create security policies • Describe common threats and methods for mitigating against them
Course Details	<p>Topic 1: Configuring Authorization & Authentication</p> <p>Topic 2: Configuring Data Access and Usage</p> <p>Topic 3: Configuring Advanced Management Tools</p> <p>Topic 4: Hands-On Lab</p>

Course Name	Maintaining Windows 10
Course Duration	1 Day
Course Structure	Instructor-Led
Course Overview	<p>In this course, students will learn how to manage and troubleshoot Windows 10. This course will deep-dive into the architecture and tools used for managing, monitoring, and troubleshooting the OS, Apps, and hardware. Students will learn about proactive and troubleshooting methodology, and how to identify and mitigate common issues.</p> <p>Audience profile Candidates for this exam are IT professionals who perform installation, configuration, general local management and maintenance of Windows 10 core services. Candidates may also be familiar with enterprise scenarios and cloud-integrated services.</p>
Course Outcome	<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none"> • Use Windows troubleshooting and monitoring tools • Troubleshoot Windows installations • Troubleshoot application installation issues • Troubleshoot web browser settings • Troubleshoot Windows authentication • Troubleshoot hardware issues related to Windows machines
Course Details	<p>Topic 1: Supporting the Windows 10 Environment</p> <p>Topic 2: Troubleshooting the Windows OS</p> <p>Topic 3: Troubleshooting Files & Applications</p> <p>Topic 4: Troubleshooting Hardware and Drivers</p> <p>Topic 5: Course Conclusion</p>
